

Maritime Security Operations

Naval Missions in the Long War

Captain Bill Hoker
Navy Operational Liaison
William.hoker@darpa.mil

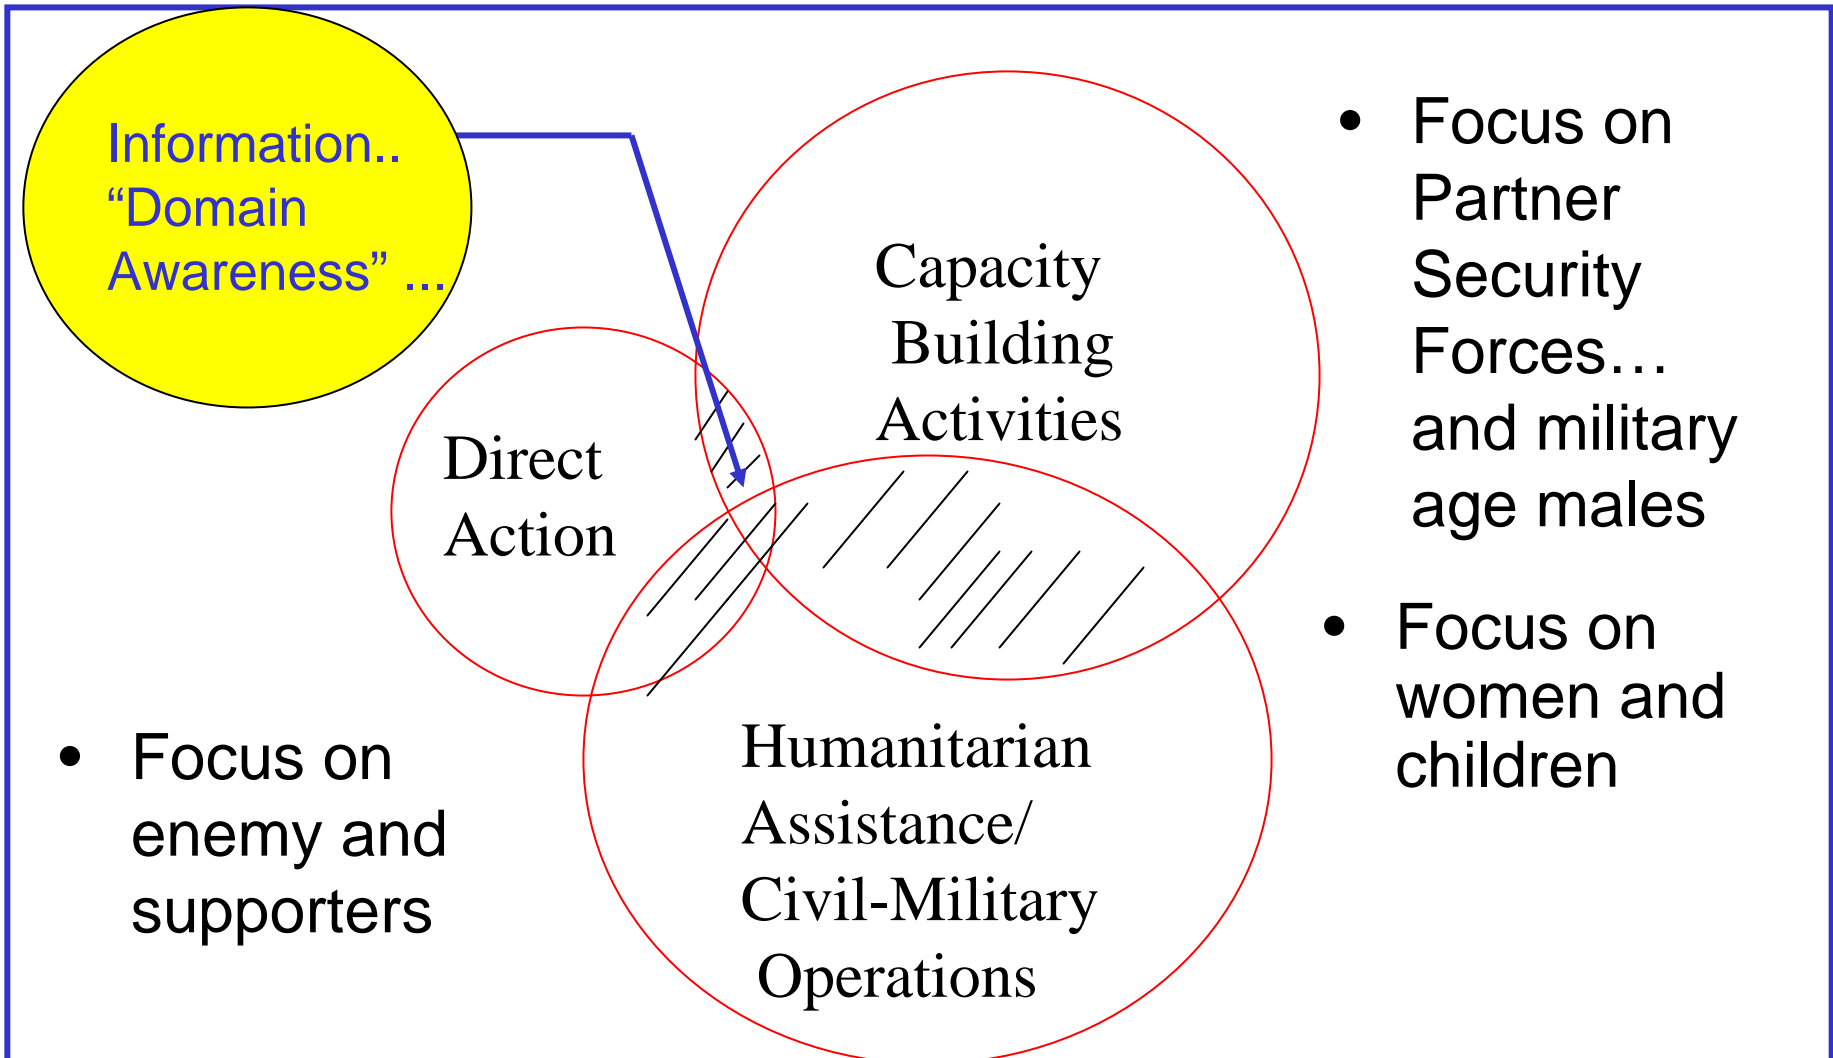

Agenda

- Counterterrorism Concept of Operations
- Environmental Overview-the Maritime Domain
- Naval Missions/Tasks in support of CT

General Counterterrorism Model

A Combined, Interagency, Military/Non-Military Approach

MOE: Removing combatants

Provide target population an alternative to enemy claims/actions.

ACCESS: No capability is exercised without permission from Partner Nation

- No Activity is unilateral
 - Partner nation always involved (combined)
- Three types of Access
 - To Partner Nation Forces
 - Navy, CG, Maritime Police, Port Security...etc
 - To Activities
 - Exercises, Subject Matter Expert Exchanges, Conferences, intel sharing, capacity building events, humanitarian assist and civil-military ops
 - To Areas
 - Territorial water, airspace

Partner nation must view our ACCESS as a good deal. How do we induce these permissions, and motivate their activities?

The MARITIME environment...

- WATER, not roads, are primary connectors
 - Inter and Intra national
- Population centers and economy are water-related
- People joined by culture, history, porous borders
- Government functions delivered via WATER
 - Security
 - Economic infrastructure
 - Education
 - Health and Sanitation

Maritime assets required

Ships are Sea Bases

- Training Camp
- Floating warehouse
- Hotel
- Police cruiser

120 nm

- Service station
- Drive Thru
- Clinic
- Airport
- Intel Center

Platform Size Comparison

Maritime Security Operations

Warfare Fundamentals in all conditions of peace or war

- Map Battlespace Physically and Electronically

- Who and what is out there
- Determine where they do, who they go with, what they do, and when

- Assess Enemy & Partner

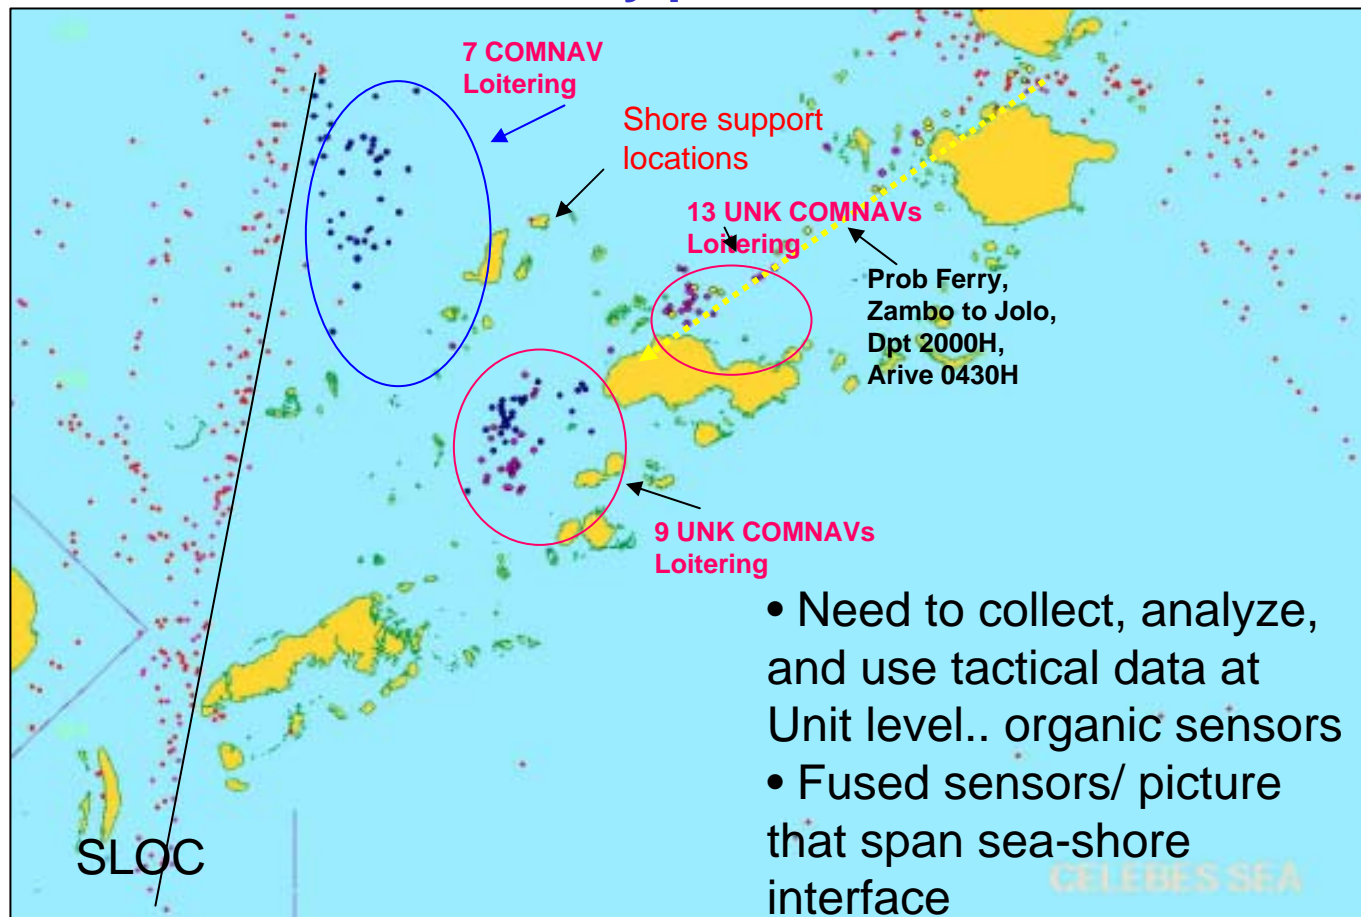

- Measure hardware, training, logistics, plans

- Apply Friendly Forces (Engage)

- Leverage Partner Nation/proxies
 - Combined forces
 - “1000 ship Navy”
- Use organic forces
 - Joint
 - Interagency

Mission Example: Sea Line of Communications (SLOC) Security

Mapping Battlespace: ID, analyze boat concentrations and shore support nodes
Assess Enemy patterns and tactics

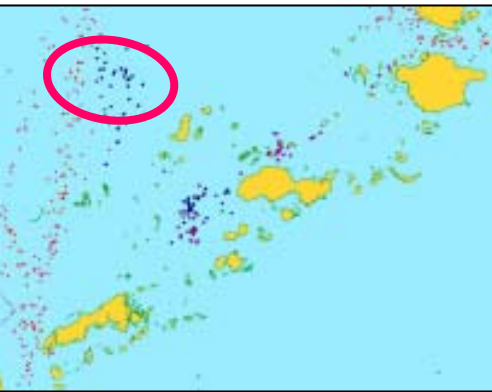

Create **Combined** Capacity Building Activity...

Assess Enemy and Partner Nation Security Forces

- Cop on the Beat.. traffic stops.. Giveaways...Safety checks

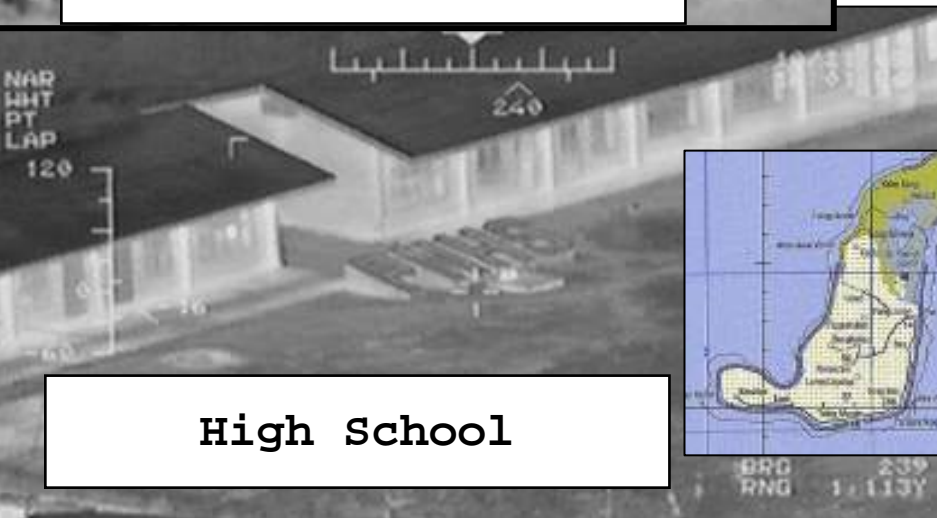

- Comprehensive Sensor Search

Humanitarian Assistance- Mapping Battlespace- support areas

Shoreside Mosque

High School

Hit'em where
they live

Improve Their
Neighborhood

Elementary School

Collect Information

Mapping battlespace- Humanitarian Assistance and **Civil-Military Ops**

Stilt Village

Conduct Hydrographic, Acoustic, Electromagnetic survey and physical study of potential sites

Sibutu Pier

- Access Areas unimproved, not well surveyed

- Small Boat ops are Key

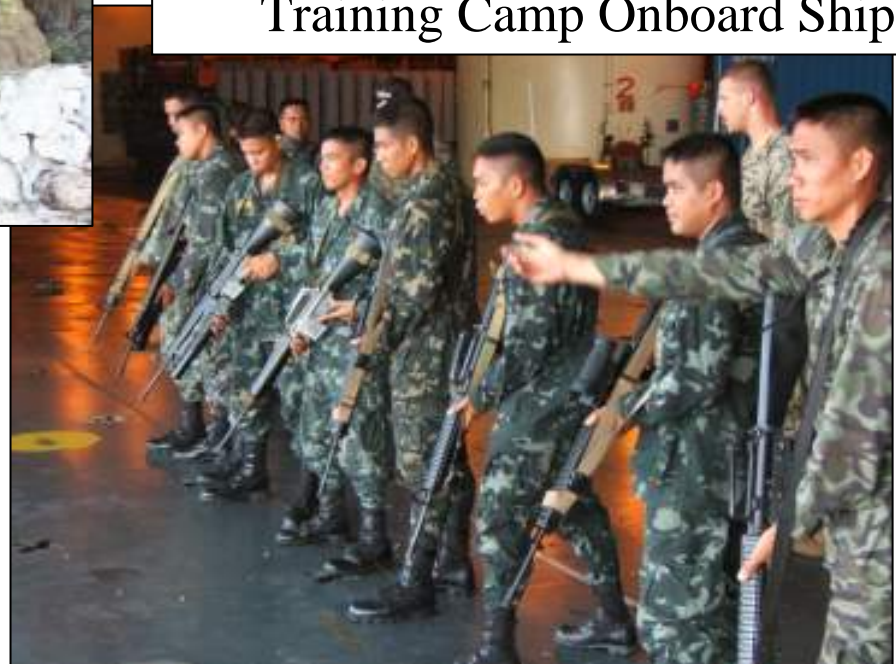

Capacity Building Operations

Planning at Headquarters

- Partner nation security forces may not be well equipped
- Value of 3 hots and a cot

Training Camp Onboard Ship

- Equipment, training will be rudimentary
- How do I induce them to get underway? Train? Work with us? Share Info?
